DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-18 and 22-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Stern et al. (US 2002/0122799 A1; "Stern"). Stern discloses a method for treating inflammation by administering soluble receptor for advanced glycation endproducts (sRAGE) (paragraph [0032]). Multiple sclerosis (MS) is explicitly disclosed as an autoimmune disease associated with inflammation (paragraph [0035]). The many ranges of therapeutic effective amounts are disclosed in paragraphs [0098-0101], which range from about 0.2µg/day/kg body weight to about 200µg/day/kg body weight or from about 0.05µg/day/kg body weight to about 500µg/day/kg body weight or from about 0.0000001mg/day/kg body weight to about 100mg/day/kg body weight or from about 0.001mg/day/kg body weight to about 50mg/day/kg body weight or from about 0.01mg/day/kg body weight to about 10mg/day/kg body weight. The instant claims merely recite the inherent features of sRAGE as there is no teaching in the instant disclosure that the route or method of administration distinguishes the method over the prior art. Claims 22-24 are not patentably distinct from the prior art teachings of kits (paragraph [0116]).

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1649

4. Claims 3-5, 10-12, and 16-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The metes and bounds of the phrase "or its equivalent" is completely subjective and therefore indefinite. Claim 17 lacks a higher end point for its range.

5. No claim is allowed.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gucker whose telephone number is 571-272-0883. The examiner can normally be reached on Mondays through Fridays from 0930 to 1800.
